

SIGULDA – LĪGATNE

Owl at Līgatne Nature Trails

Cyclists

Dauda Waterfall

Katrīnas Rock

i **Description.** Suited for fit hikers or cyclists focused on an adventure in terms of views and emotions through the most impressive primeval valley of a river in Baltics. The route runs through Gauja National Park.

☀ **Best time to go.** May–October. The route can be enjoyed in other seasons as well, including the beautiful winter days with a few snow, since the paths and forest roads are not cleaned from snow.

☰ **Route.** For hikers: Central square of Sigulda Railway Station – Raiņa Street – Līvkalna Street – Mound Paradīzes – Vējupīte Ravine – Līgatne Nature trails – Gaujas Street – Dārza Street – Sprīņu Street – Līgatne Tourism Information Centre. Cyclists head down the Gaujas Street in Sigulda and before the bridge over the River Gauja turn right on an unpaved road leading to Līgatne.

⚠ **Difficulty level.** Moderate - difficult. Strenuous in some sections (deep ravines of the rivers).

➔ **Distance.** Around 30 km.

🕒 **Duration**
10 h on foot, 4-5 h by bicycle.

🛤 **Road pavement.** Mostly forest roads, gravel roads, paths, asphalt roads in Sigulda and Līgatne.

📍 **Starting point.** Sigulda Railway Station Square. 57.15287, 24.85422

📍 **Destination**
Līgatne Tourism Information Centre. 57.23348, 25.03968

📍 **Distance to Riga.** Starting point 53 km, destination 70 km.

📍 **Way marking.** A blue diamond on white background, blue blazes on trees. Way markings continue from Gaujas Street in Sigulda up to Līgatne.

🚌 **Public transportation.** For hikers: regional buses (check timetable beforehand) run between Līgatne and Augšlīgatne, and from there on pedestrians can get on the train (station "Līgatne", railway line Rīga-Valka) or regional buses to Rīga, Cēsis and other towns. Trains (4-5 times per day) and regional buses run to Sigulda.

! **Worth knowing!** Suitable trekking boots (or an MTB/trekking bicycle) and local map or route map is necessary. Navigation devices might be useful. Cyclists should pedal with due care on the steep slopes and wooden plank-ways and bridges which can be slippery. Due to the route length, hikers should evaluate personal fitness for the route. When heading along Nurmiži Nature Reserve area, respect the information signs placed there! Walking outdoors is at one's own risk. Emergency services: 112.

! **Recommendation.** Hikers can stay overnight in Līgatne and head the next day to Cēsis (~1 day), and from Cēsis on to Valmiera (~2 days).

SIGHTSEEING OBJECTS

1 | Sigulda Railway Station
57.15287, 24.85422

2 | Raiņa Park
Pay attention! En route from the town centre to the valley of the River Vējupīte, roe deer is seen early in the mornings in the meadow near Līvkalna Street. Along Līvkalna Street there is an alley of oaks – a place to study lichen, moss, and polypores (e.g. sulphur shelves).

3 | River Vējupīte
Left tributary of the River Gauja. Length – 14 km, gradient – 88 m.

4 | Vējupīte Ravine
57.17115, 24.87634. On the banks of Vējupīte Valley, there are popular Sigulda tourism sites, such as Kraukļu Ravine and Pētera Cave.

Pay attention! The banks of Vējupīte Ravine are covered in forests of slopes and ravines with large-size decayed wood and deadwood. Here one can spot traces that woodpeckers have left on tree trunks. Ball-shaped sandstone is found on the riverbed of rivers Vējupīte and Kraukļupīte. The polypodies and common fragile fern are growing on the sandstone outcrops. The patina seen at some places on the sandstone walls is actually the velvet lichen. The ground cover of the forest reveals common moss like glittering wood-moss, red-stemmed feathermoss, goose-necked moss, and ostrich plume feathermoss. Various species of fern. On fallen trees and stumps – sulphur shelves, red banded polypore, Dryad's Saddle, and other species of mushrooms decaying the timber.

5 | Track along Gauja between farmstead "Kalna Klaukas" and Rāmnieku Stream

The section of primeval valley wall from Kalna Klaukas to Rāmnieku Brook is included in **Nurmiži Glen Reserve** which is closed to visitors. The road and its adjacent area are open to hikers and cyclists taking the route.

Pay attention! Different common plant species are found near the trail.

6 | River Dauda
Left tributary of the River Gauja with a canyon-like ravine up to 40 m deep, which is rich in sandstone outcrops. Dauda Ravine is located in the Nurmiži Glen Reserve.

Pay attention! At some places you shall see traces of wild boar, while ashore of the oxbow lakes – traces of beavers.

7 | River Sviķupīte
Left tributary of the River Gauja. "Sviķupīte ravine is located in Nurmiži Reserve and is forbidden to visit."

8 | Rāmnieku Brook
A small left tributary of the River Gauja.

9 | Dagnes (Gančauskū, Sūruma) Cave
57.24406, 24.95074. Tildurga Brook, before entering the River Gauja, has washed out a small "canyon", and on the left bank of it there is a cave-like gallery.

10 | Elpju Rock 57.24421, 24.95311
Approximately 9 m high reddish sandstone outcrop from the Gauja suite.

11 | River Vildoga (also Jāņupīte)
Left tributary of the River Gauja with a deep ravine and an impressive vertical fall (ca. 10 m/km).

12 | Rock Launagiezis (also Ērmaņu Rock) 57.25061, 24.97085
Around 600 m long and steep slope of the right side of primeval valley wall of the River Gauja covered with forests, at the feet of which there is the scenic sandstone outcrop (up to 20 m high).

13 | Tītmaņu Rock 57.24042, 24.98528
The approximately 12 m high and reddish sandstone outcrop from Gauja suite is located on the left slope of primeval valley wall of the River Gauja (~0.5 km off the river). The outcrop features **Ligoṅu (Ligoņu) Cave** and two galleries.

14 | Līgatne nature trails
57.24798, 25.01525
In the Gauja valley, in an area rich in forested ravines, nature trails and enclosures are set up to observe animals and birds characteristic of Latvian fauna. They are home to red deer, roe deer, wild boar, bears, foxes, lynx, two bird species and other wildlife. There is an entrance fee for Līgatne nature trails.

15 | Jumpravu Rock 57.24986, 25.02872
Sandstone outcrop on the left bank of the River Gauja, which runs far into the forest like a steep and rocky slope, where its feet are washed by the waters of a brook.

16 | Līgatne Ferry Crossing
57.25441, 25.04528

17 | Līgatne Paper Mill
closed territory - excursions have to be pre-booked in Līgatne TIC

18 | Līgatne Village
Līgatne village has been granted the status of a culture monument. The historic part of the village in Skolaskalns and Rīgaskalns have been restored by reconstructing the houses and environment. A place that cannot be found elsewhere in Latvia.
